Description

A revolution in topical body sculpting, BodiFirm™ is a clinically-proven formula with patent-pending iFirm™ Technology that restores the skin's youthful density by lifting sagging, crepey skin and providing a firmer, slimmer and more sculpted appearance.

Key benefits

- Firms, tightens and lifts sagging, crepey skin to tone and sculpt
- Restores the skin's youthful density and elasticity
- Diminishes the appearance of fat to contour the body
- Corrects visible photodamage and the overall health of skin
- Helps restore hydration and repair the skin's moisture barrier
- Promotes long-term skin health and supports the skin's Microbiome
- Recommended for use pre- and post-procedure to enhance patient results*

Formulated for all skin types and is:

- Oil Free
- Artificial dye free
- Skin-Neutral pH
- Formulated without alcohol, parabens, sulphates, phthalates
- Safe for pre- and post-procedure skin*

Points of difference

BodiFirm™ is unique among the competition in that it is clinically proven to:

- Work as a stand-alone product to firm, tighten and lift sagging, crepey skin**
- Show improvement in the epidermal and dermal layers by increasing epidermal thickness and skin density**
- Reduce lipid content in adipose cells to help diminish the appearance of fat**
- Improve overall skin health on a day-to-day basis by enhancing moisture, improving photodamage** and supporting the skin's Microbiome

How to use

Using a circular motion, massage into skin until fully absorbed. Apply twice daily for best results.

Tip: To see optimal results, it is recommended to exfoliate twice a week using a loofah or physical exfoliator.

*Revision Skincare® products are not intended for use on broken skin and should only be used once skin has fully healed following a procedure. **12-week study. Data on file. Results may vary.

BodiFirm™

Breakthrough body contouring lotion for firmer, more toned-looking skin

F R E Q U E N T L Y A S K E D Q U E S T I O N S

1 How is the skin on the body different than skin on the face, neck and décolletage? The skin on the body is fundamentally different than the skin on the face, neck and décolletage**. The skin on the body (epidermis and dermis) is thicker and the subcutaneous fat layer differs, which can be reflected in the appearance of the skin. For example, specific areas of the body such as the arms, abdomen, thighs and buttocks have more accumulation of adipose tissue than the face, neck and décolletage.

2 Can this product be used with body contouring procedures? BodiFirm™ is recommended for use before and after body contouring procedures such as those using radiofrequency, thermal treatment and mechanical energy to enhance patient results. Before procedures, this product helps prepare the skin for optimal outcomes by enhancing overall skin health, restoring hydration and supporting the skin's Microbiome. After procedures, BodiFirm™ helps reduce thin, crepey skin and works to firm, lift and tighten the appearance of the skin to protect the patient's investment.*

3 How do I use this product? BodiFirm™ was formulated to be a targeted treatment for the arms, abdomen, buttocks and/or thighs. One to two pumps from the 107g bottle or generous sized amounts from the 227g tube can be spread over each of these targeted areas twice daily. For someone looking to target more than one area or for full-body use, the

227g tube is recommended as it will last longer. Initial results such as an improvement in crepiness and skin texture (smoothness) can be seen as early as 4 weeks with twice daily usage**. Further improvement and optimal results can be seen after 12 weeks and beyond in the attributes mentioned above plus an improvement in skin firmness, sagging skin, elasticity and overall photodamage**.

4 Can I use BodiFirm™ on my neck? No, Nectifirm® Advanced should be used for the visible signs of ageing on the neck. BodiFirm™ has a delivery system that is optimised for the body. Additionally, BodiFirm™ addresses the body's thicker skin as well as areas where there is an increased accumulation of adipose tissue. This delivery system also allows the product to be more easily spread on larger areas such as the arms, abdomen, thighs and buttocks. In addition, the unique ingredients/technologies specifically for the body include an Adipose-Targeting Blend that includes Caffeine to help reduce the appearance of adipose tissue and assist with lipolysis to sculpt and tone the body as well as Glucosamine to help exfoliate the thicker skin on the body for more efficient product absorption.

*Revision Skincare® products are not intended for use on broken skin and should only be used once skin has fully healed following a procedure.

**12-week study. Data on file. Results may vary.
