1 Why is the formula so thick? The anhydrous (Greek origin meaning “without water”) formulation of this lip product provides a richer, more luxurious feel. It also helps the product stay put on the lips to keep key ingredients locked in for maximum benefits.

*This product contains antioxidant benefits. However, it does not have an SPF or contain sunscreen.

**Revision Skincare® products are not intended for use on broken skin and should only be used once skin has fully healed following a procedure.

2 Can this product be used immediately after lip procedures such as dermal fillers or microneedling around the vermilion border? Testing has not been carried out using YouthFull Lip Replenisher™ immediately after lip procedures, that leave the skin vulnerable to external factors. However, this product can be recommended to anyone wanting youthful, healthy lips or those considering or currently augmenting their lips with dermal fillers given that it helps replenish youthful volume and enhances definition of the lip. If used after microneedling or any procedure comprising the skin on the lips, we recommend applying to the lips only after skin has re-epithelialized.
